Sammons Financial® is the marketing name for Sammons® Financial Group, Inc.'s member companies, including North American Company for Life and Health Insurance®. Annuities and life insurance are issued by, and product guarantees are solely the responsibility of, North American Company for Life and Health Insurance.

Fixed index annuities are not a direct investment in the stock market. They are long term insurance products with guarantees backed by the issuing company. They provide the potential for interest to be credited based in part on the performance of specific indices, without the risk of loss of premium due to market downturns or fluctuation. Although fixed index annuities guarantee no loss of premium due to market downturns, deductions from the accumulation value for optional benefit riders or strategy fees or charges associated with allocations to enhanced crediting methods could exceed interest credited to the accumulation value, which would result in loss of premium. They may not be appropriate for all clients. Interest credits to a fixed index annuity will not mirror the actual performance of the relevant index.

This is not a complete comparison of all North American fixed index annuities or of the listed fixed index annuity products and optional guaranteed lifetime withdrawal benefit rider. Please see the product and rider brochures for further details on the features, limitations and complete product disclosures.

Insurance products issued by North American Company for Life and Health Insurance®, West Des Moines, Iowa. Product and features/options may not be available in all states or appropriate for all clients. See product materials and state availability chart for further details, specific features/options, and limitations by product and state.

Product features, riders and index options, including the nursing home multiplier, may not be available in all states or appropriate for all clients.

1. Premium bonus and enhanced premium bonus may vary by annuity product, state, premium band and surrender charge period selected and may be subject to a premium bonus and enhanced premium bonus recapture. Products that have premium bonuses may offer lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins than products that don't offer a premium bonus. Over time and under certain scenarios the amount of the premium bonus and enhanced premium bonus may be offset by the lower credited interest rates, lower index cap rates, lower participation rates and/or greater index margins.
2. "Income" or "lifetime income" refers to guaranteed payment of lifetime payment amounts ("LPAs"). It does not refer to interest credited to the contract. Advise clients to consult with their own tax advisor regarding tax treatment of LPAs, which will vary according to individual circumstances.
3. A surrender during the surrender charge period could result in a loss of premium surrender charge structure may vary by state.
4. Withdrawals taken prior to age 59 1/2 may be subject to IRS penalties.
5. Need to receive written proof, acceptable to us, from a physician who has determined, in a manner consistent with accepted standards and practice for the diagnosis, that you are unable to meet two of six ADLs with an expectation the condition(s) are permanent. See product brochure and disclosure for more information on the ADL definitions and qualifications. This benefit is not available when the accumulation value equals zero.
6. Enhanced Participation Rate includes a strategy charge for a higher participation rate and is known as a "Strategy Fee Annual Percentage" in the contract. The charge will be deducted once each term at the earliest of a full surrender, at the time of a partial withdrawal that exceeds the penalty-free withdrawal amount or the end of the term. The charge will be deducted from the accumulated value allocated to the enhanced participation rate method. The strategy charge will be deducted regardless of the interest credited to the contract and can lead to loss of premium. The annual charge is multiplied by two for the Two year crediting strategy.
7. EBR can only be elected at product issue. Rider charge is 0.95% of accumulation value at each contract anniversary during the surrender charge period. This rider charge is considered a penalty-free withdrawal, and does not reduce the penalty-free withdrawal available. The rider charge, under certain scenarios, may result in loss of premium.
8. The income base bonus is applied one-time to the initial deferred income base. The deferred income base is the part of the total income base that may be used to activate new LPA income streams. While the income base bonus will incrementally increase the deferred income base, resulting in higher potential future income, the rider charges collected will also incrementally increase since the rider charge is 1.25% of the total income base.
